## **TOUGH ENOUGH FOR THE FACTORY, BUT RIGHT AT HOME IN YOUR HOUSE**

### **Home + Housewares Show Goers Get A Sneak Peak At One Pass Collection Pan**

**Hollister, CA** — Designed to be tough enough for big jobs on a factory floor, yet versatile enough for little chores around the house, the One Pass Collection Pan is the latest innovation from Don Varner. An automotive industry legend, Varner turned his talents to the home, creating the original Water Blade and a host of other outside the box concepts. Now he has turned his attention to the Home + Housewares Show. Come by Booth N8663 to see exactly what hot rods and housewares have in common.

“Don't call it a dust pan,” cautions Varner. “It works to collect liquids as well as dust and other debris.” The One Pass Collection Pan is the perfect companion to the Floorblade. The extra-large collection area can handle most messes in... One Pass! It features a unique patent-pending built in drain and filter allowing separation of fluids and solid waste. The handle is specifically designed to clip the One Pass Floorblade compactly and securely into place when not in use.

The patented Floorblade, combined with a first of its kind Collection Pan, makes for a one-two punch for wet and dry applications. The Floorblade is used like a standard broom, collecting all manner of debris and fluids quickly and easily. Its silicone blade is safe with all common cleaners and lubricants and works on virtually any surface in the home or shop. The Y-Blade edge conforms to the surface and removes over 90% of fluid quickly leaving a dry, safe surface behind.

Perfect for homes, factories, shops, restaurants, bars, janitorial and anywhere else spills happen. Surfaces dry faster and sharp debris never has to be handled. Make a safer environment for your family, customers or team members.

#### **FEATURES & BENEFITS**

- Patent-pending drain and filter for separating solid waste from fluids
- Oversized collection tray
- Virtually eliminates messy towels and soggy chamois
- Excellent for bars, restaurant and home use
- Temperature and cleanser resistant

Be the very first to see the One Pass Collection Pan during the show, the public release date is not until May! The entire range of innovative One Pass products will be displayed during the 2018 International Home + Housewares Show, March 10-13 in Chicago, Illinois. More details on One Pass can be found here:

###

**About One Pass USA** — One Pass founder Don Varner is a professional innovator, inveterate tinkerer and legend in the automotive world. Hot rod enthusiasts might recognize him as the designer behind such famous custom 'Rods as *El Matador*, *Silhouette* and *The California Star*. Varner turned the custom world on its ear back in 1984 when California Star took top honors at the Grand National Oakland Roadster Show. Despite enormous controversy, Don's version of the classic 1927 Model T earned the title "World's Most Beautiful Roadster" and cemented his place in the automotive world. It was this kind of disruptive solution that brought the original Water Blade into existence, upending the car care world in the process. That sounds a bit dramatic, but take a look at how many copies have hit the market since and you'll see what we mean. When we released the first Water Blade in 1996, it was called the "Original California Water Blade" — now it's simply Original Water Blade. Don takes enormous pride in every product he designs, so you know if it bears the One Pass name, it's a game changer!
